Product Information PQHY-P200YHM-A : WY Series 8hp Water Cooled Unit R410A Heat Pump

The WY Series has all the benefits of the Y Series using water cooled condensing units. It is also able to produce heat recovery via the water circuit between heat source units, making for a very economical system. Like the air source versions, the water cooled units benefit from a modular design approach. A twinning kit is required for double combinations.
